

SURF & SOUND EVENTS

Wedding Services & Pricing Information

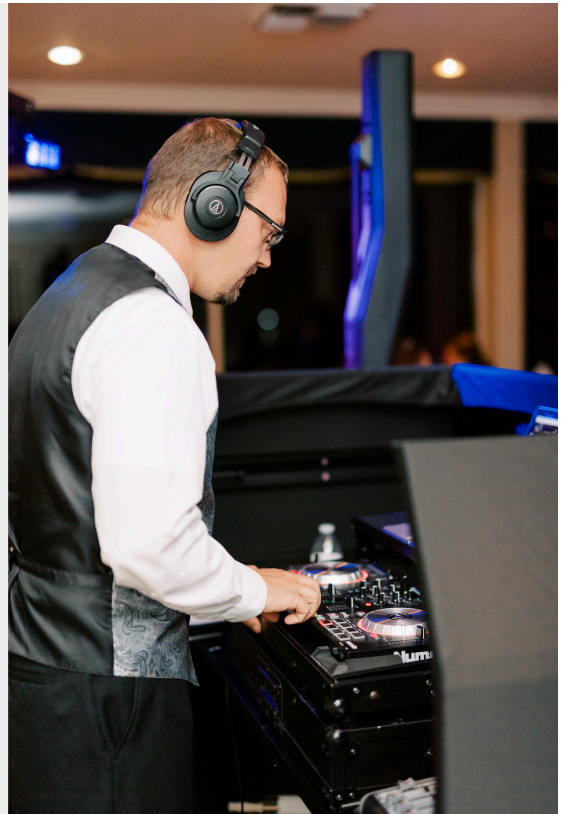

1) DJ & MC Service for Reception & Cocktail Hour - \$1,295

Includes:

- Up to 6 hours of DJ & Emcee performance for Cocktail Hour & Reception
- Dance Floor Effects Lighting
- 60-mile travel radius from Newport News (\$3/mile beyond)

The DJ: With 8+ years of professional experience I personally help you plan every detail. I communicate often, arrive early, and execute flawlessly. I am prepared, personable, flexible, and consider it my joy and duty to help you and your guests have the best reception possible! I also have a Clean Music Policy (*see below for details).

The Equipment: Entry-level equipment has its place, but it's not at your wedding! You're getting only the best to make sure everything sounds powerful and clear and looks professional and elegant. EV Evolve 50 column arrays and ETX subwoofers, a professional DJ table, Apple computers, and high-res music files stored to disk. No matter the size, your reception deserves the absolute best!

SURF & SOUND EVENTS

2) Ceremony Sound Service - \$295

Includes:

- 1 column array speaker, battery-powered for remote locations.
- 2 wireless, high-quality, low visibility lapel microphones: one each for officiant and groom assuring that everything is loud and clear
- 2 wireless handheld microphones: perfect for readings or vocals. With or without microphone stands. (Or can be 3 lapels and 1 handheld.)
- Music playback from my Apple computer.

The Sound Engineer: I was a musician and sound-engineer before I was a DJ. I'm bringing my decades of technical and artistic experience to one of the most important moments in your life. Microphones and instruments need to be properly pre-amped, mixed, equalized, and compressed to sound clean and clear. And wireless microphones require intricate setup to avoid interference and dropouts. I have you covered!

The Equipment: From the speaker to the wireless digital mixer to the wireless microphone rack, my equipment is well above entry-level! My commitment to excellence starts with having the best equipment. Column array speakers look and sound better than standard PA speakers. Top-notch wireless microphones means no drop-outs. And a wirelessly controlled mixer means no soundboard and no unsightly cables.

SURF & SOUND EVENTS

3) Live Acoustic Entertainment - \$150 per 1-hour performance

Aside from having a generally excellent DJ, nothing can set your event apart better than some live entertainment. Treat you and your guests to an upgraded Cocktail Hour and/or Dinner experience by allowing me and my three Taylor guitars (6-string, 12-string, and Baritone) to entertain with acoustic covers of the likes of Jack Johnson, Fleetwood Mac, Eagles, Bruno Mars, Zac Brown Band, Of Monsters and Men, Foo Fighters, and many others. (Full song list and video available at my website.)

I'm happy to tailor the performance to the needs of the moment: be that more subdued, classy, and romantic for Dinner background music, or a livelier presentation for Cocktail Hour.

All information subject to change

*Clean Music Policy: While words like “clean” and “appropriate” are admittedly subjective categories, I will only play “clean” versions of songs. I also will not play songs that are grossly offensive or inappropriate even when there is a radio-friendly version. I would be glad to offer more clarity by phone if this is a potential concern in either direction. Thank you for your understanding.
